Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

-

I am ecosystem ecologist. My research has focused on understanding the effects of global environmental change on the ecology and biogeochemistry of fluvial ecosystems. With this purpose, I have used multidisciplinary approaches, including different spatiotemporal scales of observation/experimentation and novel techniques. My investigations have contributed to: (i) Comprehend the ecology and biogeochemistry of intermittent rivers, (ii) Understand the impact of human activities on in-stream nutrient and carbon processing and its implications for global budgets, and (iii) Develop and implement novel techniques for measuring stream ecosystem functioning.

In 2002, I obtained a BSc in Biology at the Complutense University of Madrid, where I enjoyed a final year Collaboration Scholarship from the Spanish Government to work on fluvial pollution. Then, I performed an 8-month research stay to investigate the effects of urban pollution on stream communities at the University of Rome 'Tor Vergata', funded by a Socrates-Erasmus Fellowship.

In 2003, I enrolled in a PhD at the Centre for Advanced Studies of Blanes (CEAB-CSIC) and the University of Barcelona (UB), funded by an I3P-CSIC Predoctoral Fellowship. In 2008, I obtained my PhD on nutrient spiraling in Mediterranean streams, which was awarded with the PhD Extraordinary Award from UB and the Honorable Mention Award from the Iberian Association of Limnology. During my PhD, I performed short-term research stays in USA, Puerto Rico and Austria.

From 2008 to 2011, I was a postdoctoral research fellow at the Leibniz-Institute of Freshwater Ecology and Inland Fisheries, funded by a DAAD-'laCaixa' Fellowship. During this time, I investigated the ecology and biogeochemistry of intermittent streams. From 2011 to 2014, I was a research fellow at the Catalan Institute for Water Research, funded by a Juan de la Cierva fellowship from the Spanish Government. My work during this period focused on carbon cycling in intermittent streams. From 2015 to 2019, I was a postdoctoral research associate at the University of the Basque Country, funded by the European project 'Managing the effects of multiple stressors on aquatic ecosystems under water scarcity (GLOBAQUA)'.

In 2019, I obtained a position as Assistant Professor at UB, funded by the Serra Húnter Program of the Catalan Government. Since then, my research has focused on carbon cycling and restoration. My teaching duties include coordination and participation in several courses at

BSc and MSc level. To improve my teaching skills, I successfully completed a master's degree in university teaching from UB in 2021 and I am member of GIDEC teaching innovation group.

During my career, I have participated in over 20 national and international projects. Currently, I am co-PI of the project 'Alteration of carbon sinks and sources in shrinking inland waters (Alter-C)', funded by the Spanish Government. In addition, I am PI of the Spanish research team of the project 'Quantifying restoration success across biomes by linking biodiversity, multifunctionality and hydromorphological heterogeneity (RESTOLINK)', recommended for funding by the Joint Call Biodiversa & Water JPI 2020-2021 and foreseen to start in April 2022. Moreover, I am Core Team member of the International crowdfunded networks DRYFLUX and 'The 1000 Intermittent Rivers Project' and member of the research group FORESTREAM, funded by the Catalan Government.

I have published over 100 publications, of which 87 are articles in SCI journals. My current WoS/GoogleScholar h index is 34/39 with a total of 3003/4293 citations. In addition, I have contributed to over 200 presentations at conferences and workshops, including 2 plenaries, 3 invited talks with paid registration and travel, and 11 invited seminars.

I have co-supervised 5 PhD theses, of which two are completed and three are on-going. My first former PhD student (Miquel Ribot) currently holds a permanent research assistant position at CEAB-CSIC. My second former PhD student (Lluís Gómez-Gener) is currently a 'laCaixa' postdoctoral fellow at CREAM. In addition, I have supervised or co-supervised 7 MSc theses (6 completed) and 2 BSc theses (all completed).

I was member of the Editorial Board of the journals Aquatic Sciences (2019-2022), PeerJ (2017-2021), and Frontiers in Environmental Science (2015-2019). Since 2021, I am Co-Editor in Chief of the journal Limnetica. In addition, I have been reviewer for DAAD and 'laCaixa' fellowship programs and several national science foundations (e.g., Spain, Germany, Hong Kong).

My work has been accredited by various quality assurance agencies. I received the I3 Research Certification from the Spanish Government as well as the Accreditation for Tenure-track Lecturer and Associate Professor from the Spanish, Catalan, and Basque University Quality Assurance Agencies.
